

United States Population

As the US [population](#) continues to age, an increasing percentage of neurosurgical patients are elderly. Geriatric populations already account for over 25% of US hospitalizations ^{[1\)](#)} and by 2030, 5% of the US population is predicted to be octogenarians ^{[2\)](#)}. Additionally, the population over the age of 65 is expected to double by 2040 ^{[3\)](#)}.
