

Valsartan

Valsartan, sold under the brand name Diovan among others, is a medication used to treat [high blood pressure](#), heart failure, and diabetic kidney disease.

It belongs to a class of medications referred to as angiotensin II receptor blockers (ARBs). It is a reasonable initial treatment for high blood pressure.

It is taken by mouth.[8] Versions are available as the combination valsartan/hydrochlorothiazide, valsartan/amlodipine, valsartan/amlodipine/hydrochlorothiazide, or valsartan/sacubitril.
