

# Vestibular schwannoma guidelines

This [guideline](#) series yielded some [Level of evidence 2](#) recommendations and a greater number of [Level of evidence 3](#) recommendations directed at the management of [Vestibular schwannoma](#) (VS). Importantly, in some cases, a number of well-designed questions and subsequent searches did not yield information that allowed creation of a meaningful and justifiable recommendation.

This series of guidelines was constructed to assess the most current and clinically relevant evidence for the management of VS. They set a benchmark regarding the current evidence base for this type of tumor while also highlighting important key areas for future basic and clinical research, particularly on those topics for which no recommendations could be formulated. The full guidelines can be found at: <https://www.cns.org/guidelines/guidelines-management-patients-vestibular-schwannoma><sup>1)</sup>.
