

Visionsense VSII system

The Visionsense VSII system is a complete solution enabling to use a minimally invasive stereoscopic (3D) camera, for neurosurgical applications.

The VSII system has 510(k) clearance and is CE Mark approved.

Benefits

Treat extended skull-base and keyhole neurosurgical lesions in a minimally invasive manner, safely and reproducibly

Improved depth perception and a clearer understanding of complex surgical anatomy scenarios

Improved ergonomics resulting in easy operation and reduced fatigue

Decreased learning curve

Potential Patient Benefits

Improved clinical outcomes

Safer operation

Increased satisfaction

Reduced discomfort

Shorter operation time

Faster recovery and return to normal activities

Improved cosmetics through Natural Orifice Surgery with no visible scars or smaller incisions
