

Von Recklinghausen disease

Von Recklinghausen's disease (VRD) is a genetic disorder characterized by the growth of tumors on the nerves. The disease can also affect the skin and cause bone deformities. There are three forms of VRD:

[neurofibromatosis type 1 \(NF1\)](#)

[neurofibromatosis type 2 \(NF2\)](#)

[schwannomatosis](#), which is a variant of NF2
