

Weston Hurst syndrome

Weston-Hurst syndrome is an exceptional variant of [acute disseminated encephalomyelitis](#) (ADEM) characterized by [brain hemorrhages](#). [Lesions](#) are usually [supratentorial](#) and [death](#) is a usual [outcome](#). Bonduelle et al. from the Department of Neurology, Bordeaux University Hospital, Neurosurgery, Clinique Navarre, Pau, France, report a cerebellar Weston-Hurst syndrome early treated by [craniectomy](#), [steroids](#) and [plasma](#) exchange. This is the first case of [infratentorial](#) Weston-Hurst syndrome associated with a favorable outcome ¹⁾.
