

Wilbrand's knee

Inferonasal fibres of the [optic nerve](#) which go into the contralateral optic nerve 4 mm before crossing over to the opposite [optic tract](#). A lesion here produces a [junctional scotoma](#).

Compression of the [optic nerve](#) near the [chiasm](#) may produce a superior temporal quadrant defect in the contralateral [eye](#) ([junctional scotoma](#) “pie in the sky” defect) from injury to the anterior [Wilbrand's knee](#) ¹⁾.
