

XBP1

X-box [binding protein](#) 1, also known as XBP1, is a protein which in humans is encoded by the XBP1 gene.

The XBP1 gene is located on chromosome 22 while a closely related pseudogene has been identified and localized to chromosome 5.

The XBP1 protein is a [transcription factor](#) that regulates the expression of genes important to the proper functioning of the [immune system](#) and in the cellular stress response.
